

**Jefferson County Photography Club  
Minutes  
March 9, 2021**

**Old Business:**

**Rip's Demo on Astrophotography**

Rip is putting together his demo where he will discuss Astrophotography Using Remotely Controlled Telescopes. Rip will cover data acquisition, file formats, and the general workflow for combining filtered greyscale images to color. He will demonstrate the process on two different images and provide information about the different websites where remote telescope imaging is available,

**We need to reach out and try to get some non-member participation**

**New Business:**

**May Meeting in person?**

There was a suggestion that we poll the members and see if they are willing to attend in person.

We also discussed a hybrid meeting that could include both live and zoom participation. Of course, all of this is dependent on everybody attending in person being fully vaccinated.

**Assignment Collections;**

Members shared images that included "stairs, assorted collections of things, birds on the wing, and glass paper weights".

**May assignment:**

**3 B&W shots and why did you choose to go with B&W**

**8:20 Adjourn**
